

## Oncternal Therapeutics to Provide Business Update and Report Second Quarter 2023 Financial Results

Aug 3, 2023 at 4:30 PM EDT

SAN DIEGO, Aug. 03, 2023 (GLOBE NEWSWIRE) -- Oncternal Therapeutics, Inc. (Nasdaq: ONCT), a clinical-stage biopharmaceutical company focused on the development of novel oncology therapies, today announced that it will report second quarter 2023 financial results after the U.S. financial markets close on Thursday, August 10, 2023. Oncternal's management will host a webcast at 2:00 p.m. PT ( 5:00 p.m. ET) to provide a business update and discuss the Company's second quarter financial results.

The live webcast of the call will be available online at [investor.oncternal.com](https://investor.oncternal.com) and the call will be archived there for at least 30 days.

### About Oncternal Therapeutics

Oncternal Therapeutics is a clinical-stage biopharmaceutical company focused on the development of novel oncology therapies for the treatment of patients with cancers that have critical unmet medical need. Oncternal pursues drug development targeting promising, yet untapped biological pathways implicated in cancer generation or progression, focusing on hematological malignancies and prostate cancer. **ONCT-808** is an investigational autologous chimeric antigen receptor T (CAR T) cell therapy that targets Receptor Tyrosine Kinase-Like Orphan Receptor 1 (ROR1) using the binding domain from zilovertamab. Oncternal has initiated Study ONCT-808-101 ([NCT05588440](https://clinicaltrials.gov/ct2/show/NCT05588440)) for the treatment of patients with relapsed or refractory aggressive B-cell lymphoma, including patients who have failed previous CD19 CAR T treatment. ONCT-808 has demonstrated activity in preclinical models against multiple hematological malignancies and solid tumors and has been shown to be specific for cancer cells expressing ROR1. Oncternal has developed a robust and reproducible manufacturing process that has the potential to reduce the time patients must wait for their individual CAR T product to be produced, compared with approved CAR T products. **ONCT-534** is a dual-action androgen receptor inhibitor (DAARI) with preclinical activity in prostate cancer models against both unmutated androgen receptor (AR), and against multiple forms of AR aberrations. It is a potential treatment for patients with mCRPC and unmet medical need because of resistance to androgen receptor inhibitors, including those with AR amplification, mutations in the AR ligand binding domain (LBD), or splice variants with loss of the AR LBD. Final IND-enabling studies for ONCT-534 have been completed. **Zilovertamab** is an investigational monoclonal antibody designed to inhibit the function of ROR1. Zilovertamab showed evidence of antitumor activity and was well tolerated in Phase 1/2 Study CIRM-0001 ([NCT03088878](https://clinicaltrials.gov/ct2/show/NCT03088878)) in combination with ibrutinib for the treatment of patients with MCL, chronic lymphocytic leukemia (CLL) and marginal zone lymphoma (MZL). Zilovertamab is being evaluated in two investigator-initiated studies: a Phase 2 clinical trial of zilovertamab in combination with venetoclax, a Bcl-2 inhibitor, in patients with R/R CLL ([NCT04501939](https://clinicaltrials.gov/ct2/show/NCT04501939)), and a Phase 1b study of zilovertamab in combination with docetaxel in patients with metastatic castration-resistant prostate cancer ([NCT05156905](https://clinicaltrials.gov/ct2/show/NCT05156905)). More information on our company and programs is available at <https://oncternal.com/>.
